

Executive Summary

41.72 %

of booking attempts did not
result in completed rides

103,024

Total Bookings

58,28%

Completed

₹ 23.7 M

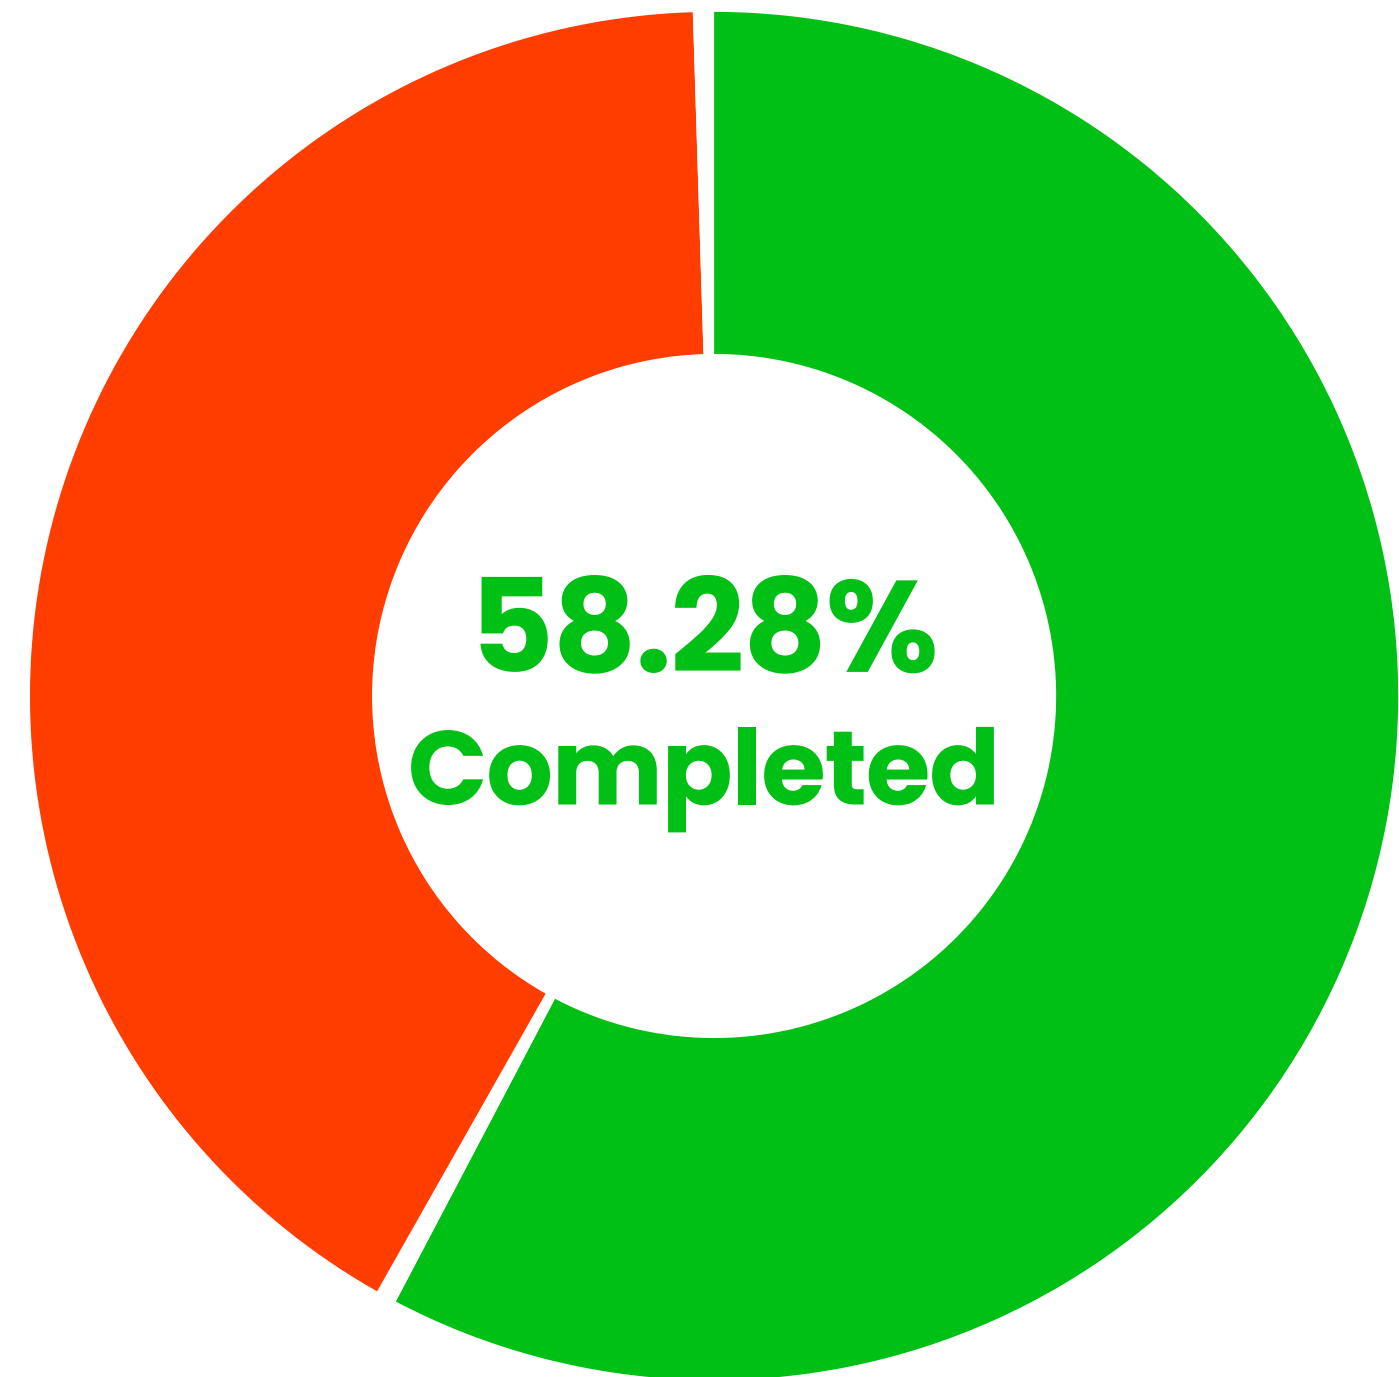

Booking Value at Risk

Operational and supply-side issues are the primary drivers of ride failure

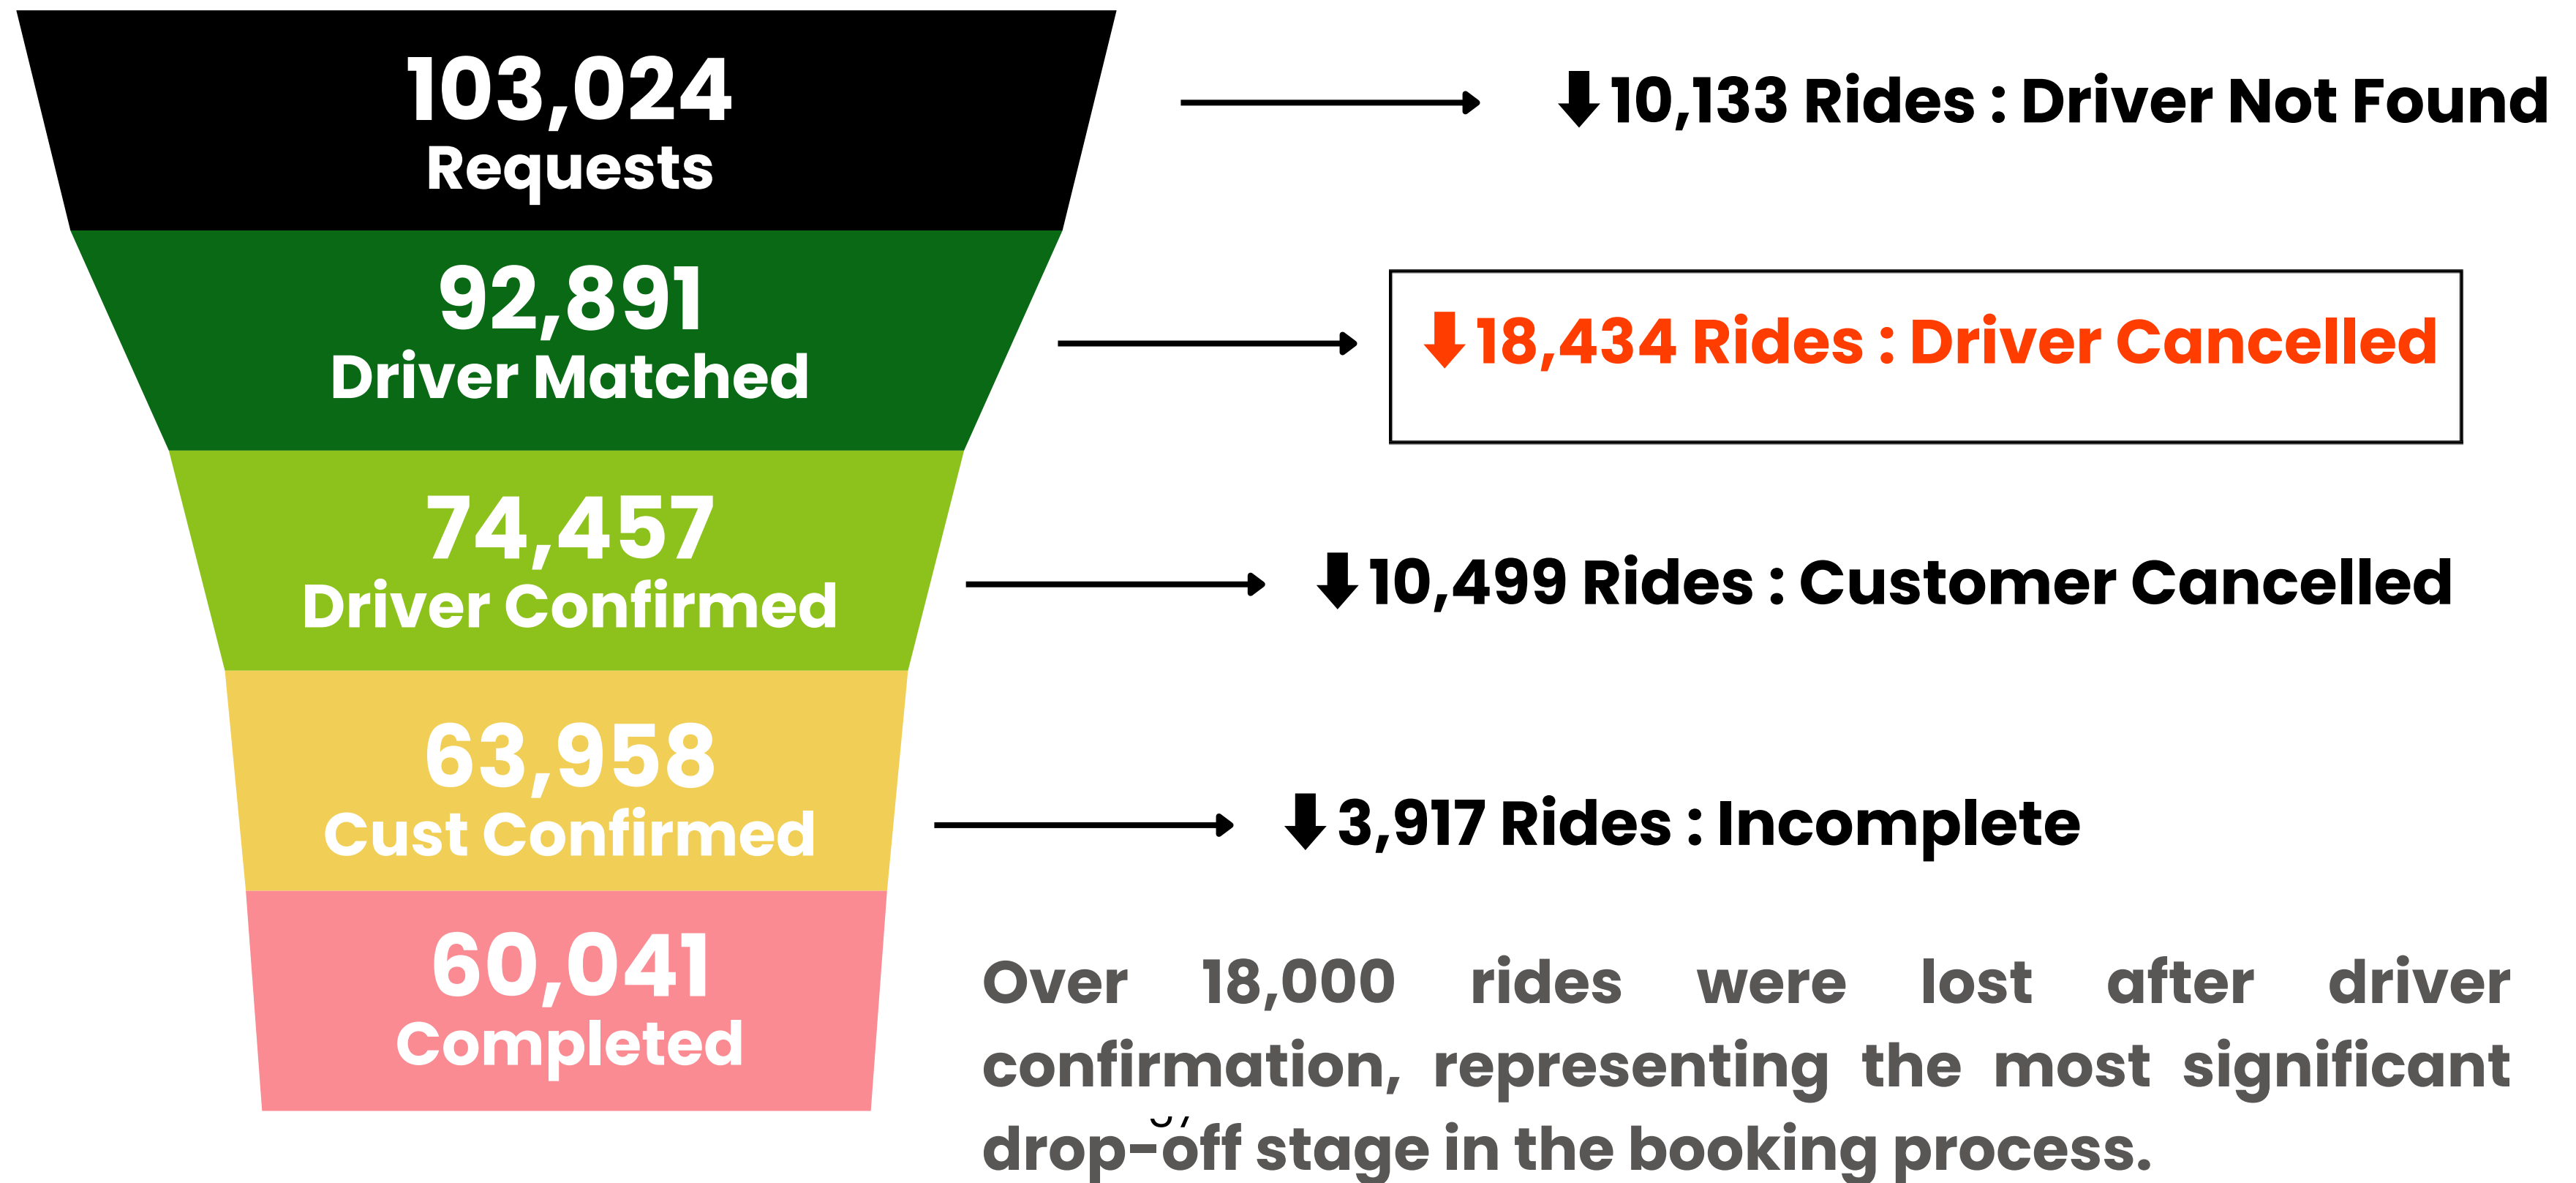

Business Problem

How effectively is customer demand converted into completed rides?

More than 4 in 10 booking attempts fail to convert into completed rides

Where are Bookings Lost?

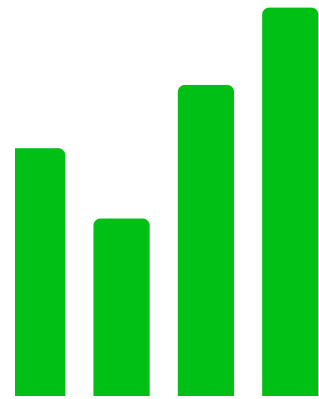

Business Impact

How much value is being **lost**?

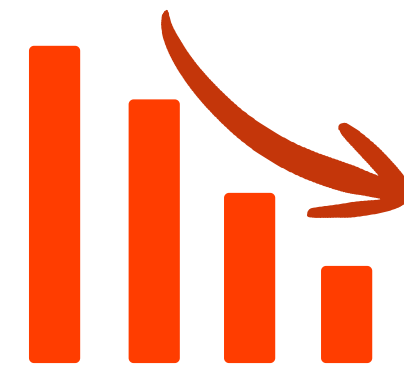

COMPLETED BOOKING VALUE

₹ 32.83 M

UNREALISED BOOKING VALUE

₹ 23.7 M

What Causes Booking Failures?

Driver Cancellation Reasons

1. **Personal & car related issues**
2. More than permitted passengers
3. Customer-related issues
4. Customer was coughing or sick

Incomplete Rides Reasons

1. Customer demand
2. **Vehicle breakdown**
3. Other issue

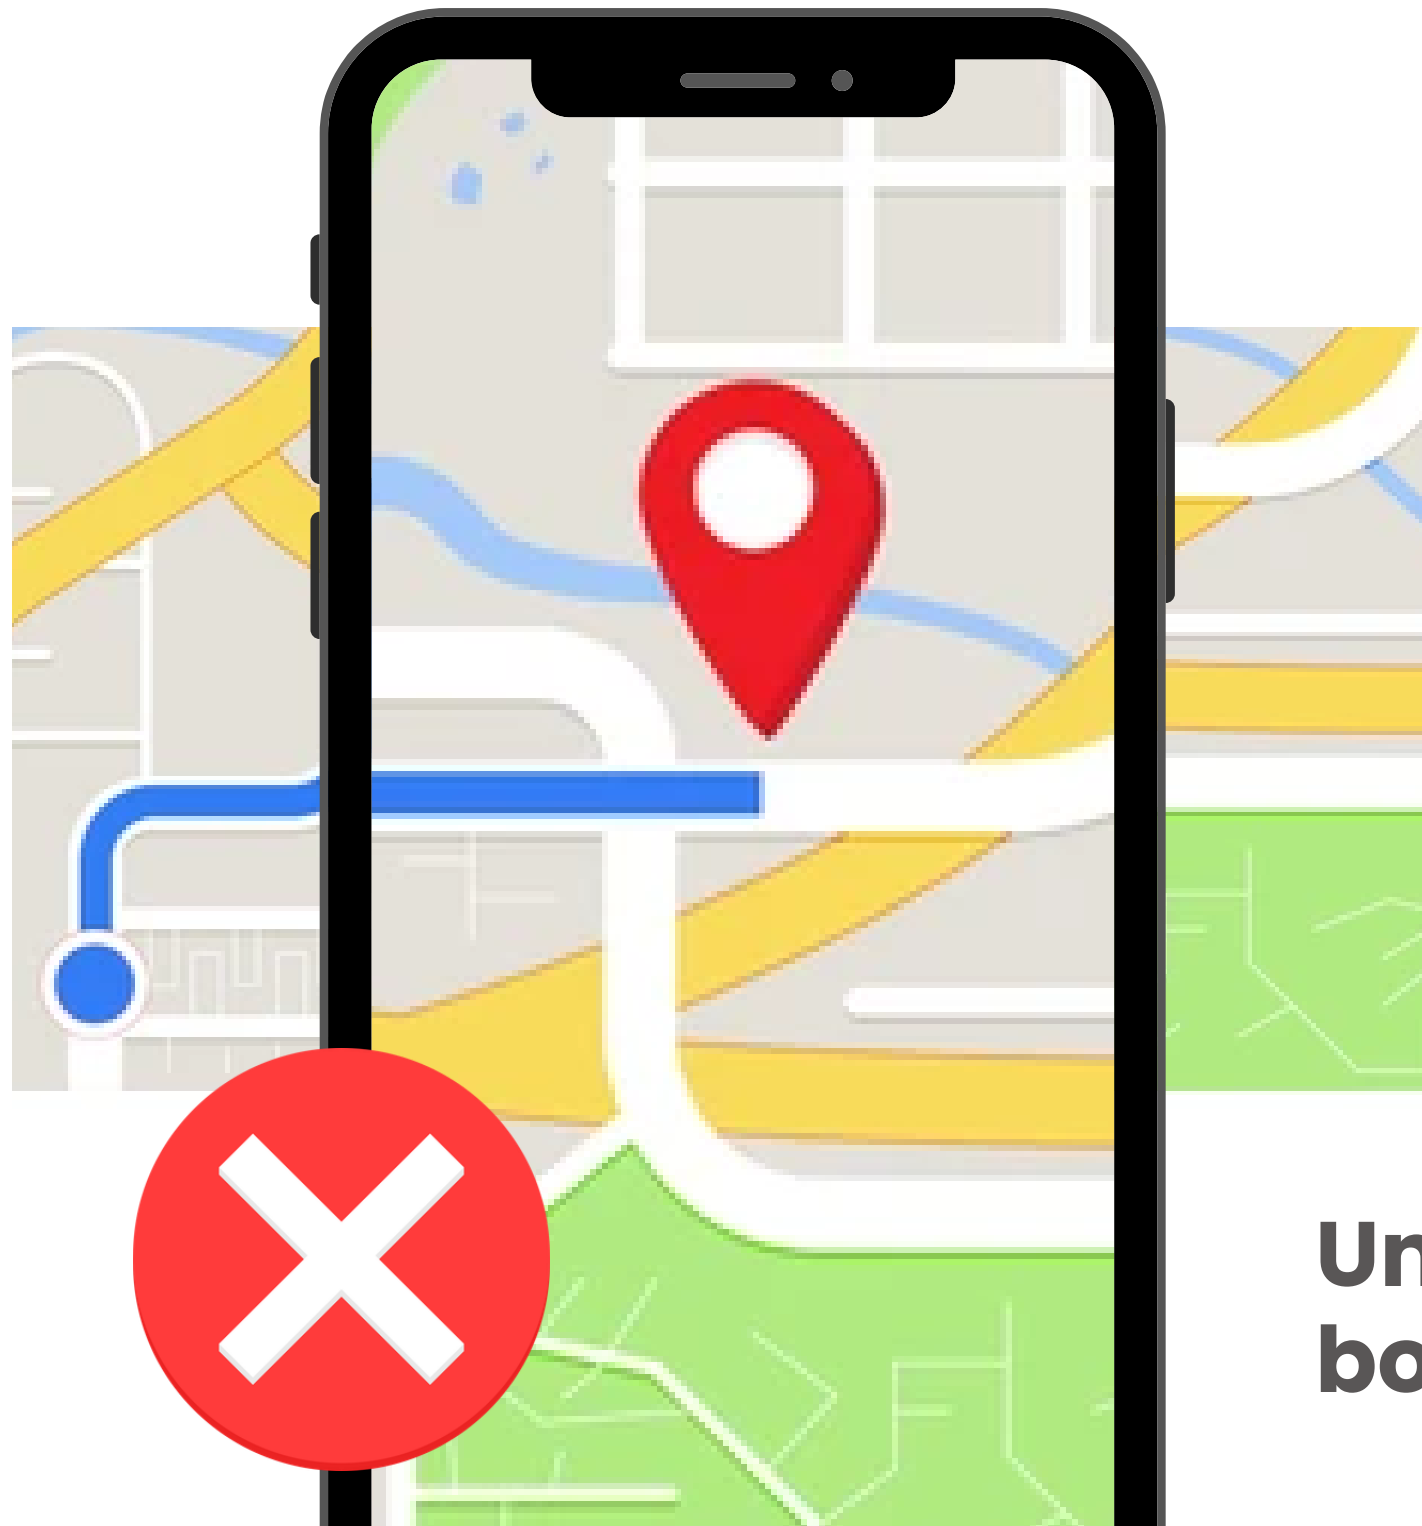

Cust Cancellation Reasons

1. **AC is not working**
2. **Driver is not moving towards pickup location**
3. **Driver asked customer to cancel**
4. Change of plans
5. Wrong pickup address

Operational and supply-side issues appear repeatedly across multiple failure categories

Are Failed Bookings Recovered?

Do customers immediately rebook after a failed ride?

- Same-day retry behaviour is extremely rare.
- Most failed bookings are not immediately recovered
- **E.g. of the 1,725 customers who experienced multiple unsuccessful bookings, only 19 attempted another booking on the same day.**

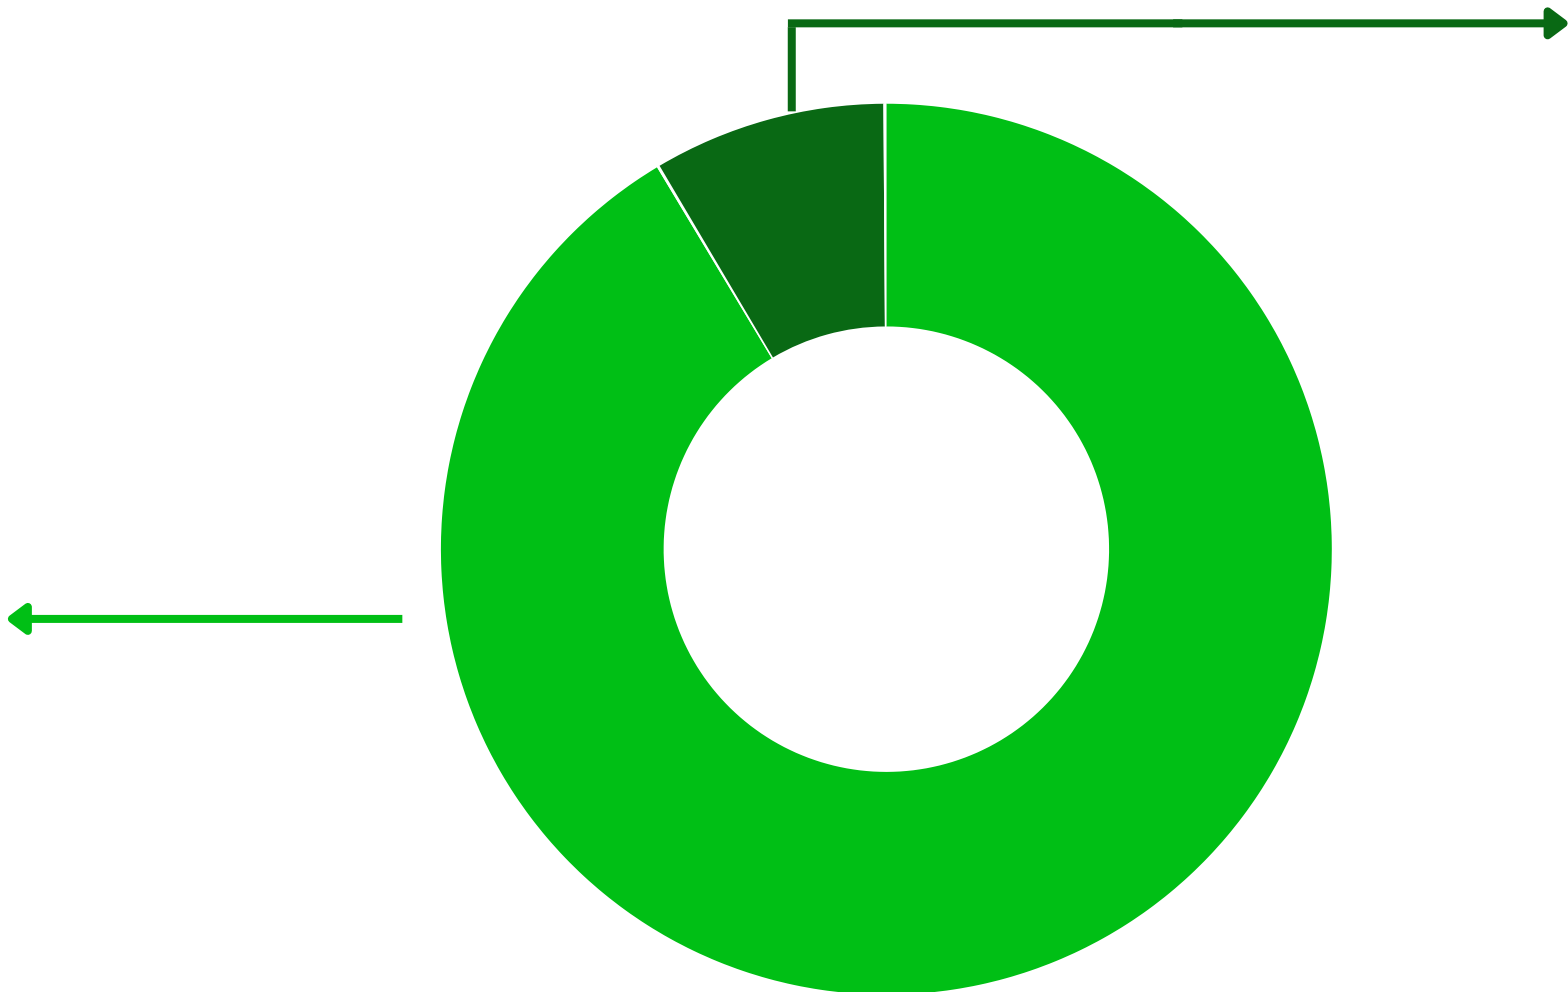

Unsuccessful bookings often translate into lost booking opportunities

Repeat Customer Behaviour

Among 94,544 customers

86,590

One-time
Customers
(91.6%)

7,954

Repeat
Customers
(8.4%)

At least **1,725** customers repeatedly experienced unsuccessful bookings, which is evidence of consistent unmet demand

Among Repeat Customers

3,653

Only Successful
Bookings (45.9%)

1,725

Only Unsuccessful
Bookings (21.7%)

2,576

Mixed Outcomes
(32.4%)

Are Customers Simply Retrying?

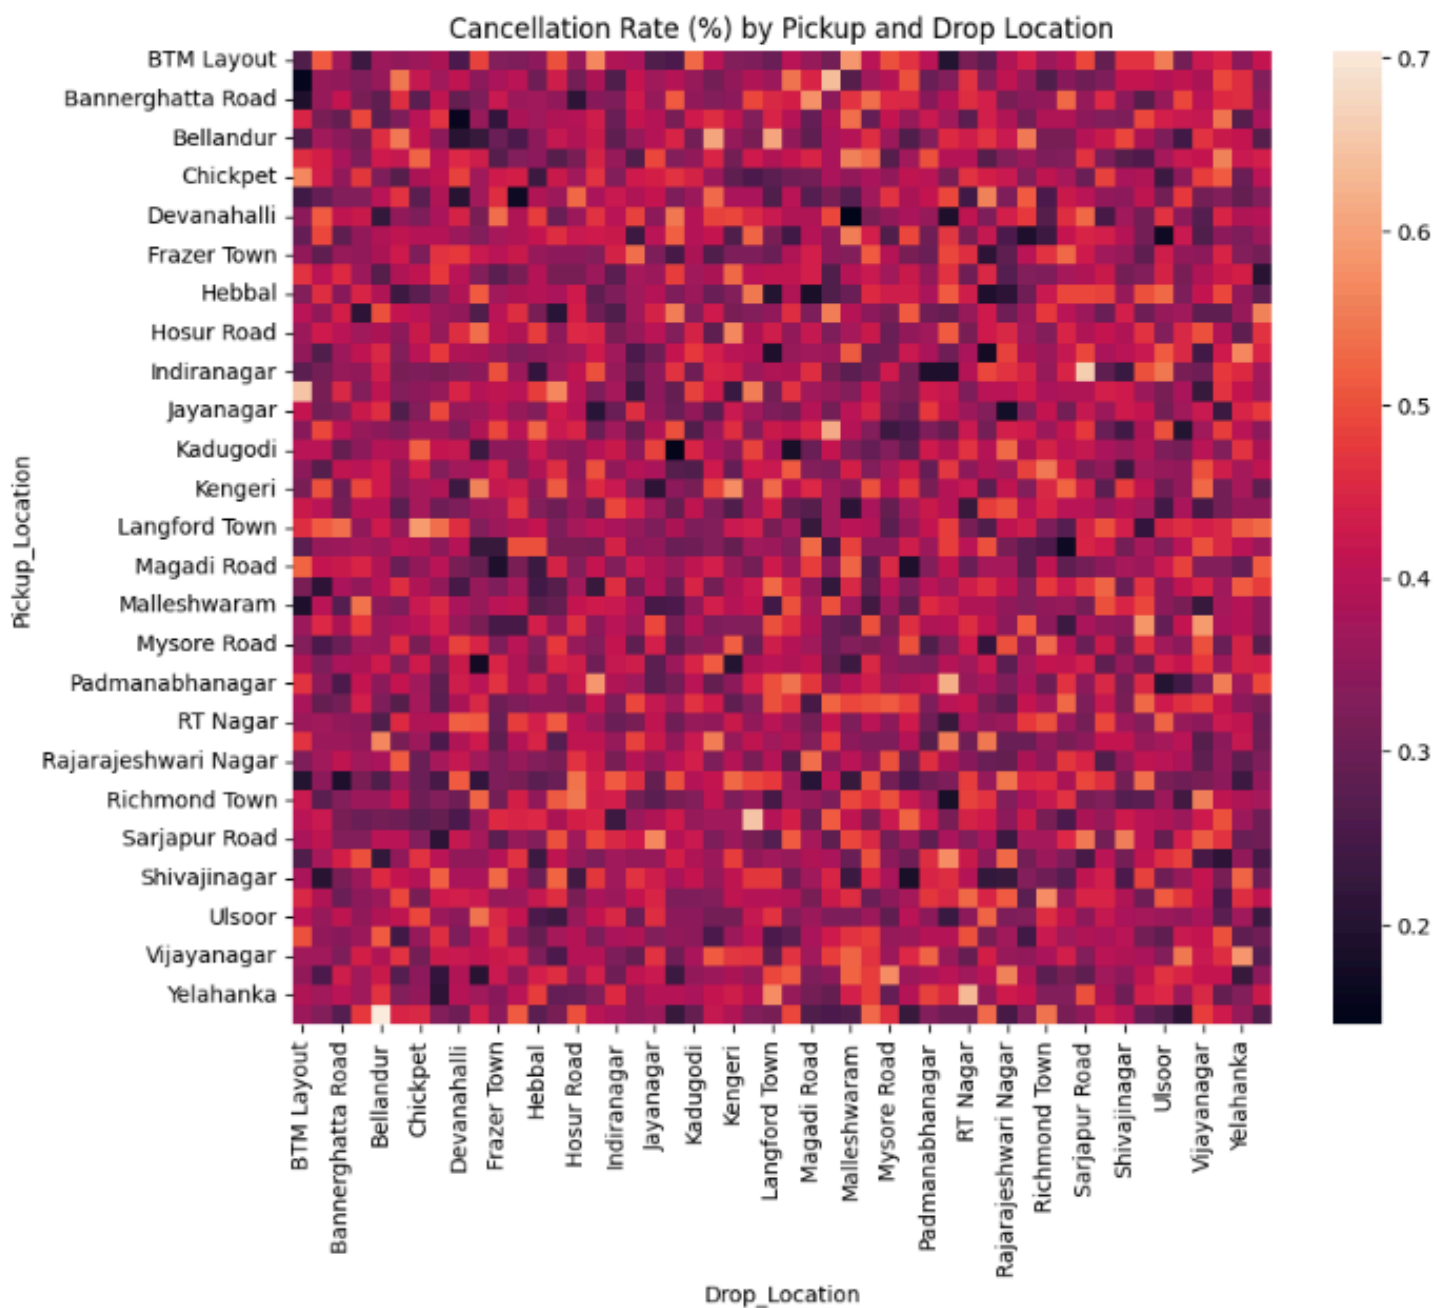

- **Most unsuccessful customers return on different days.**
- **E.g. of the 1,725 customers who experienced multiple unsuccessful bookings, 1,071 customers repeatedly booked similar routes at similar times on different days.**

The findings suggest the presence of persistent unmet demand.

Route-Level Evidence

Do outcomes vary by location?

Failure rate vary significantly across pickup-drop location

Failure Rate = (Incomplete + Driver Cancelled + Customer Cancelled + Driver Not Found) ÷ Total Bookings × 100%

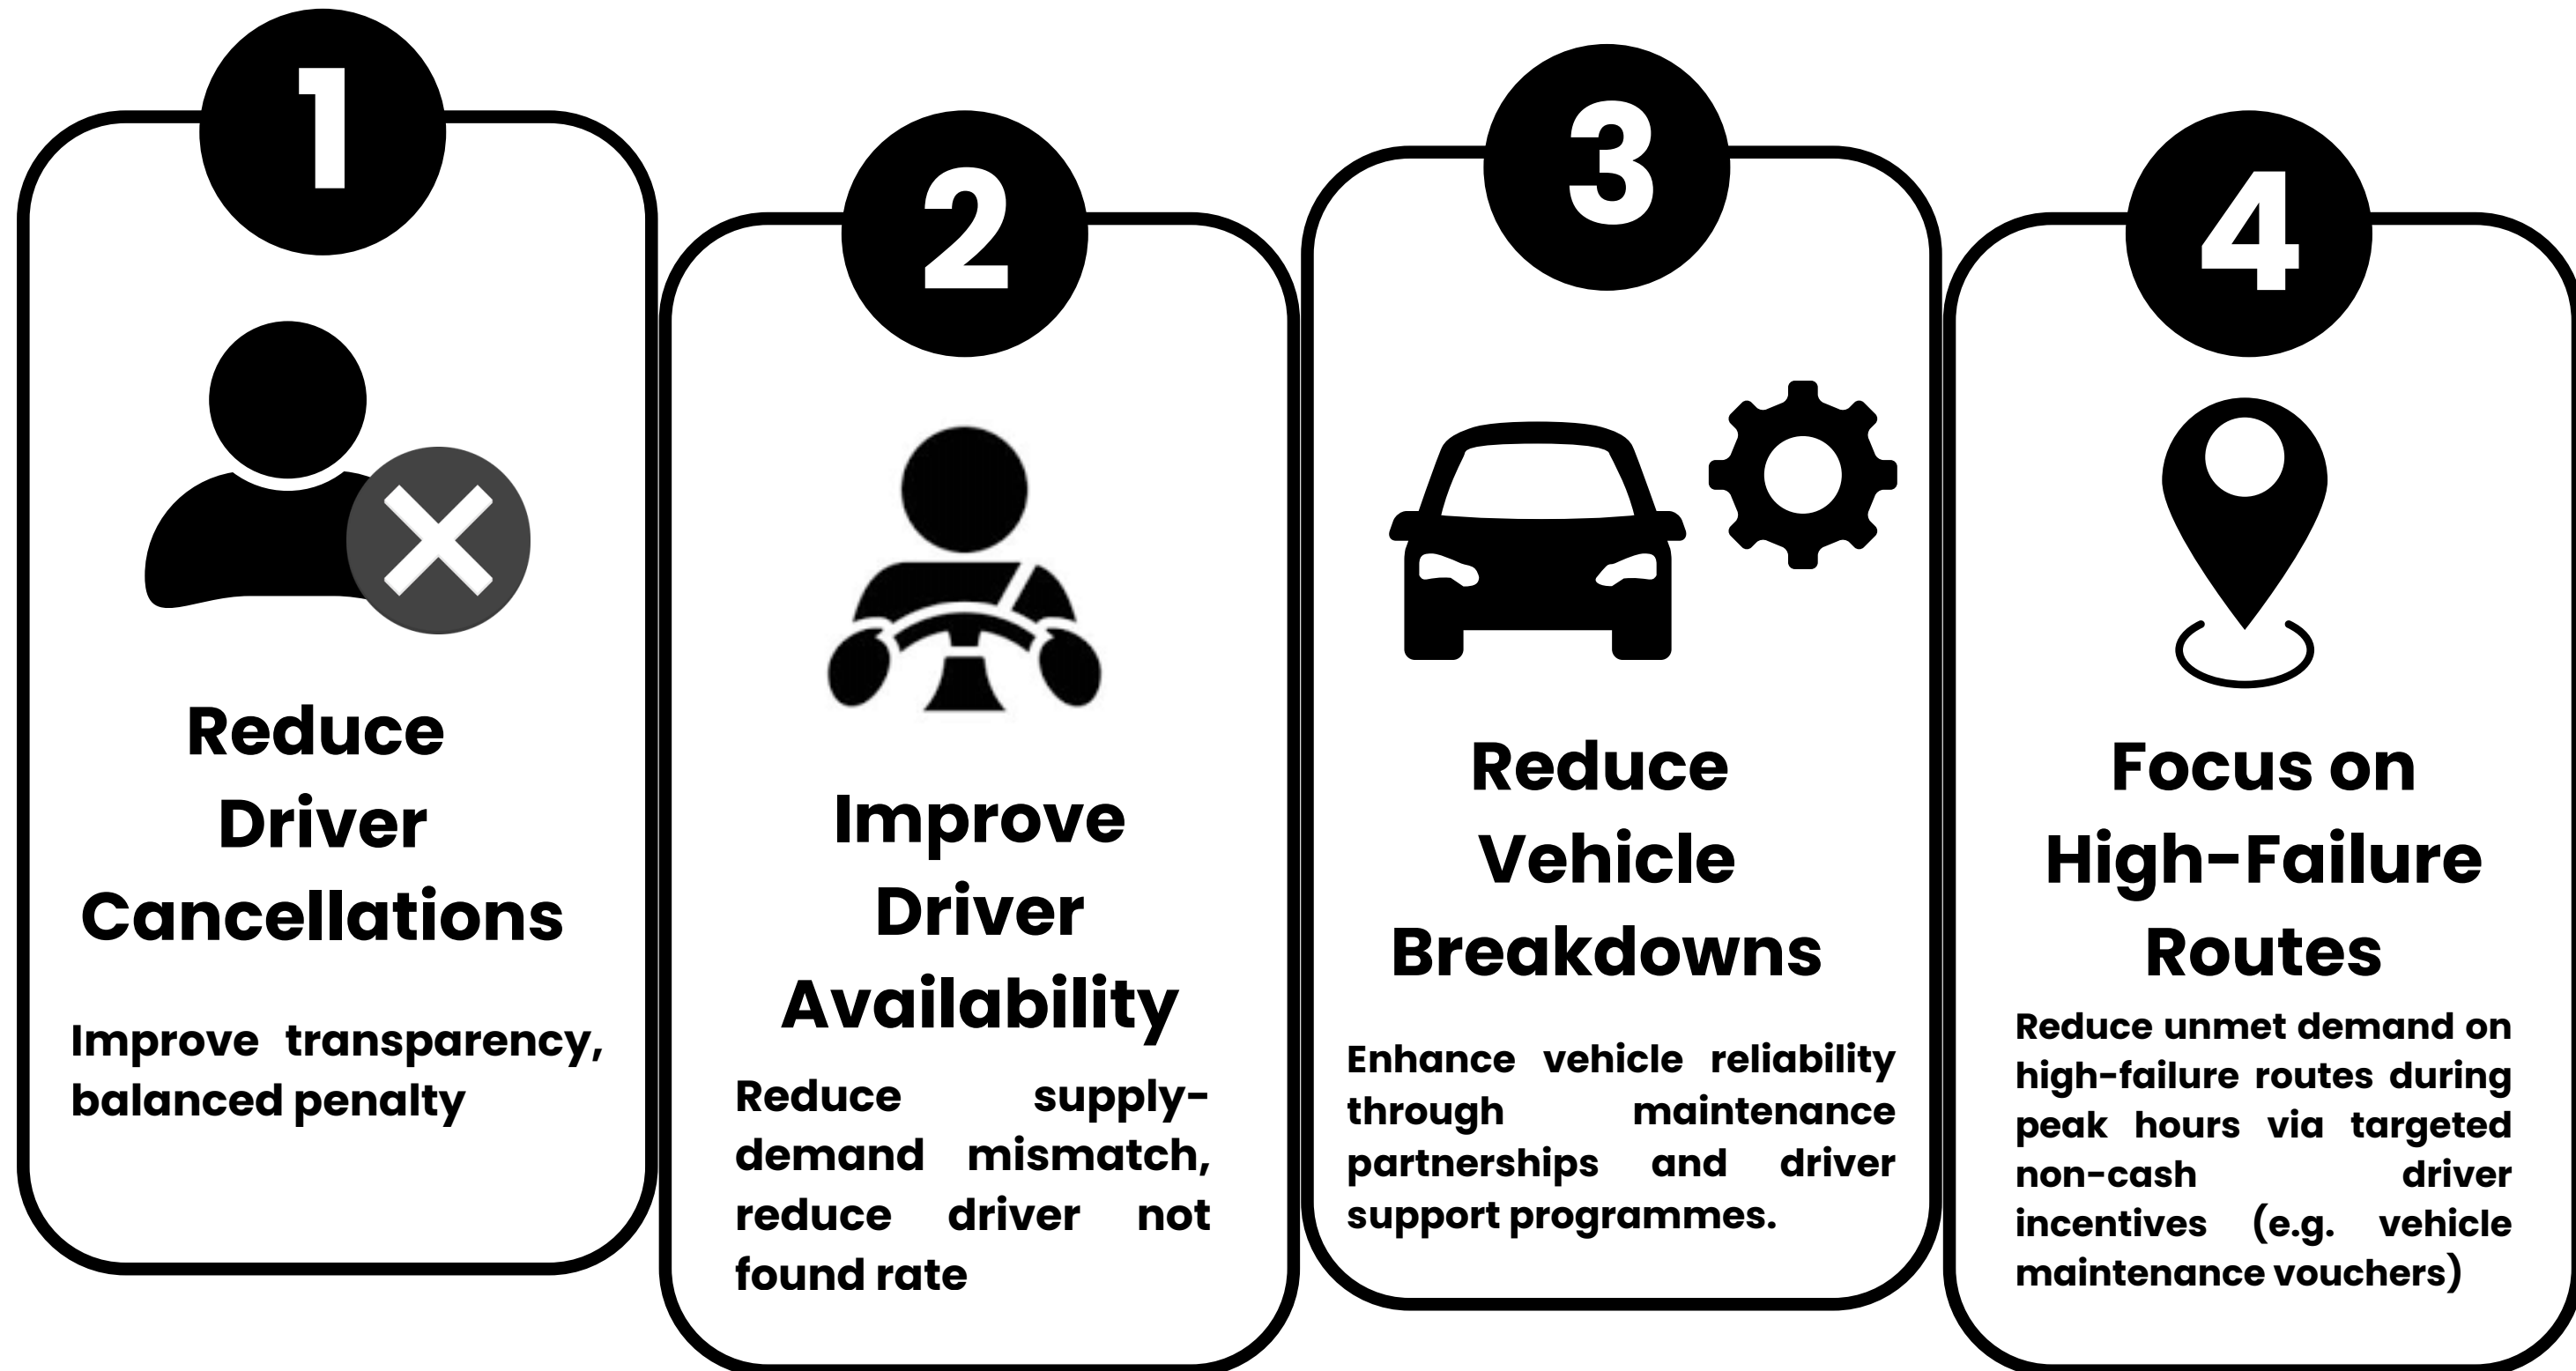

Top 10 Failure Rate by Routes

Pickup Location	Drop Location	Failure Rate	Total Bookings
Yeshwanthpur	Bellandur	0.703704	27
Indiranagar	Sarjapur Road	0.659091	44
JP Nagar	BTM Layout	0.648649	37
Sahakar Nagar	Koramangala	0.648649	37
Banashankari	Majestic	0.640000	50
Yelahanka	RT Nagar	0.631579	38
Padmanabhanagar	Peenya	0.617647	34
KR Puram	Majestic	0.615385	26
Bellandur	Kammanahalli	0.605263	38
Bellandur	Langford Town	0.604651	43

Note: Bellandur is a major IT hub, where high demand and severe congestion contribute to elevated booking failure rates.

Operational Priorities

Focus areas to convert unmet demand into completed rides

Final Conclusion

- **Out of 103,024 booking requests, only 58.28% resulted in completed rides.**
- **41.72% of booking requests failed to convert into completed rides, which represent more than 23.7 M in unrealised booking value.**
- **The evidence suggests that operational reliability and supply availability are the primary constraints on successful rides**
- **Improving driver reliability, service availability, and route level performance offers greatest opportunity to convert unmet demand into successful rides**
